## Making Kiosks Easy

## The PKS-1535 Payment Kiosk Modules

### PKS-1535 Interior Modules

**Screen**

**Bill Acceptor**

**Card Reader**

**Printer**

**24v Power**

**Power Strip**

**Computer**

**Fan**

Paralan Kiosk Solutions kiosks typically have the following key modules:

**19 Inch Touch Screen** - High resolution visual display and data entry.

**Intel I5 Computer** - Very fast transaction processing and communications.

**Industrial Printer** - High quality thermal transaction receipts.

**Modern Bill Acceptor** - Accepts and verifies 1 to 100 dollar denominations.

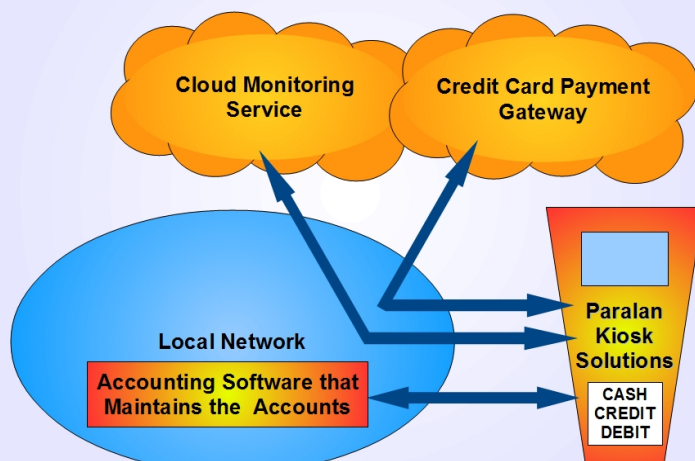

**Powerful Credit Card Reader** - Discover, VISA, Master Card, American Express.

### Why Choose Paralan Kiosk Solutions?

- Kiosks designed specifically to work with your accounting packages.
- The most modern Cloud Monitoring Service on the market today.
- Able to modify and update kiosk software remotely and efficiently.
- Quick response to technical issues, and questions.
- Secure, real time transaction recording. No long delays.
- Maintenance service for 24/7 kiosk operation, with minimal down time.
- Reasonable cost. Fast ROI. Financing is available.

## Remotely Monitor and Update Your Kiosks From Anywhere

### Direct Transaction Updates Communications Structure

All Paralan Kiosk Solutions kiosks are remotely monitored, and designed for complete cloud control of the payment center. This is the new way that kiosks are being monitored, and updated. No longer does servicing the payment kiosk require going on-site to troubleshoot, or to reset the kiosk.

The kiosks allow quick determination of any technical issues. They let the utility company system administrators control the kiosks from anywhere.

Paralan Kiosk Solutions kiosks handle both Cash and Credit card transactions, with credit card authorization performed through the accounting system, or directly through a credit card gateway.

## The PKS-1535 Payment Kiosk

Paralan Kiosk Solutions has developed indoor, outdoor and through wall kiosks specifically for utility bill payments. They automatically update an account with the transaction. This gives the utility company a payment kiosk solution that helps members make quick cash and credit card bill payments any time of the day or night, without the need for an employee to be in attendance.

The kiosks can be installed inside the company's facilities, a store, or a high traffic area. They connect to the accounting interface module for quick transaction recording which helps keep electricity, water or gas from being cutoff. Contact Paralan Kiosk Solutions to discuss the cost savings and benefits of having bill pay kiosks available for use.

## Kiosks that auto-update accounts

### Payment Transactions Cloud Accessed

All transactions that are made through our kiosks are easily accessed by system administrators through the cloud. This remote access capability allows for quick transaction audit issue resolutions.

The old method of a kiosk printing a report locally that needs to be passed around to the right people is over. Now the right people have the transaction information at their finger tips through the Paralan Kiosk Solutions cloud services.

### Remote administrator viewing of payment transactions

Kiosk ID	Transaction ID	Amount	When Paid	Account	Payment Ref	Status	Action
140001	Blue Ridge Kiosk 01	1.00	10 Mar 2012 14:02	20177400		Payment processed successfully	view

140013	Blue Ridge Kiosk 01	1.00	10 Mar 2012 15:30	101101		Payment processed successfully	view

All of your kiosks can be monitored through the cloud

### Keep Utility Services On 24/7

All Paralan Kiosk Solutions kiosks have easy to use transaction screens that guide the user through a smooth payment process. The ability to make a cash payment at night, during the weekends and on holidays can make the difference between having electricity, gas, or water, or struggling for days without it.

**BLUE RIDGE**  
electric membership corp.

**Yes!**

Now you can make payments any time of the day or night seven days a week.
